

Joint Symposium 19

Oncology & Theranostics Committee / European Neuroendocrine Tumor Society (ENETS)
Thursday, October 29, 16:35-18:05

Session Title

Impacting the Outcome of High Grade NET Patients

Chairperson

Michael Gabriel (Linz, Austria)

Programme

- 16:35 - 17:04 Hojjat Ahmadzadehfar (Dortmund, Germany): Nuclear Medicine Physicians' View (PRRT; SIRT)
- 17:04 - 17:33 Nicola Fazio (Milan, Italy / ENETS): Oncologists' View
- 17:33 - 18:02 Andrea Frilling (London, United Kingdom / ENETS): Surgeons' View

Educational Objectives

1. Different approaches in the treatment of high grade NET.
2. Advantages and disadvantages of various procedures and consideration of certain patient-related requirements.
3. Challenges of different treatment disciplines in the treatment of high grade NET, and requirement of an interdisciplinary approach in a multimodal treatment concept.

Summary:

The aim of this session is to convey relationships in the management of patients with neuroendocrine tumor disease. Particular attention is paid to interdisciplinarity. Especially the treatment of high grade tumors is a great challenge, which is why this aspect is given special consideration. Various different nuclear medicine, oncological and surgical treatment concepts will be presented by different experts.

Key Words

Neuroendocrine Tumors, High grade Tumors, Interdisciplinary Treatment
